

January 18, 2002

Advice No. 7631

To: Illinois Commerce Commission
527 East Capitol Avenue
Springfield, Illinois 62794-9280

The accompanying tariff pages listed on the attachment are issued by Ameritech Illinois and transmitted to you for filing.

Pursuant to the Commission's Order in Docket No. 98-0396, issued October 16, 2001, Ameritech Illinois with this Compliance Tariff Filing makes changes to various Sections of its Unbundled Network Elements (UNE) Tariff, Ill. C.C. No. 20, Part 19, and its Interconnection Services Tariff, Ill. C.C. No. 20, Part 23. These changes comply with the requirements of the TELRIC Compliance Order, including the Commission's directives that 1) Ameritech Illinois replace in its tariff the non-recurring UNE loop and port service order charges and UNE line connection charges proposed by MCI WorldCom for the corresponding charges that now appear in those tariffs and 2) set forth with more specificity the non-recurring charges that apply when various UNEs are ordered by incorporating in each UNE tariff a separate section that sets forth the non-recurring charges and eliminating cross-references to other tariffs.

These UNE offerings are classified as noncompetitive telecommunications service pursuant to the applicable provisions of the Public Utilities Act.

Notice will be published in newspapers of general circulation and copies of the filing are available for public inspection in the Company's public offices in accordance with 83 Illinois Administrative Code.

We respectfully request your Commission to accept these sheets to become effective January 19, 2002.

Any questions and correspondence regarding this filing should be directed to Larry Parker, Director, Regulatory Affairs, who may be reached at:

Ameritech Illinois
225 West Randolph Street, 27C
Chicago, Illinois 60606
Tel. No.: (312) 551-9172
FAX No.: (312) 727-4771

Please acknowledge receipt by returning the extra copy of this letter.

Sincerely,

(Signed) Larry Parker
Director – Regulatory Affairs

PART 19 - Unbundled Network Elements and Number
Portability
SECTION 2 - Unbundled Loops and HFPL

2nd Revised Sheet No. 29
Cancels
1st Revised Sheet No. 29

4. APPLICATION OF RATES

Loop Rates and Charges are shown in 5. of this Section. Rates are applied as follows:

4.1 Unbundled Loop Rates and Charges:

Rates and charges for unbundled loops are applied on an individual loop basis.

4.2 Service Charges:

- Service Order Charges

Service Order Charge - nonrecurring charge which covers receiving, recording and processing information necessary to execute a telecommunications carrier's request. Unless otherwise specified, the appropriate Service Order Charge is applicable for a telecommunications carrier order for equipment or service and is in addition to any other nonrecurring charges which may be applicable for the equipment or service furnished.

(N)

Analog Loops

(N)

Initial Charge

(T)

The Initial Service Order Charge, as appropriate, applies when a telecommunications carrier initiates an order for an analog or 2-Wire digital loop. This charge applies per occasion per order per telecommunications carrier's end user location.

Subsequent Charge

(T)

This charge is applicable when adding or changing service on an existing loop or HFPL service, per occasion.

Record Work Charge

(N)

This charge applies to a subsequent request that involves only record activity.

(N)

Chicago, Illinois 60606

4. APPLICATION OF RATES (cont'd)

(N)

4.2 Service Charges: (cont'd)

- Service Order Charges (cont'd)

Digital Loops

Administrative Charge - applies when a telecommunications carrier initiates an order for installation or for disconnection. This charge applies per carrier order regardless of the number of digital loops on the order.

Design and Central Office Connection Charge - applies when a telecommunications carrier's initiated order requires engineering design and/or installation or disconnection or change at the Company wire center. This charge applies per digital loop on the order.

Carrier Connection Charge - applies when a telecommunications carrier's initiated order requires installation or disconnection or change at the telecommunications carrier's end user location. This charge applies per digital loop on the order.

(N)

- Line Connection Charge - Analog and 2-Wire Digital Loop

/1/

This charge is applicable for each analog or 2-Wire digital loop that is ordered.

- Ameritech Cross-Connection Service

Ameritech Cross-Connection Service rates are applicable when loops are provisioned to be cross-connected to transmission equipment and/or transport provided by the telecommunications carrier or a third party and is applied per loop cross-connected based on the type of interface (2-wire or 4-wire, etc.)

4. APPLICATION OF RATES (cont'd)

4.2 Service Charges: (cont'd)

- Manual Loop Qualification Charge

Per minute engineering labor rate for supplying manual loop make-up. Charge is assessed for the actual time required to provide a manual loop qualification.

- HFPL Cross-Connect Configuration Charge

This charge is applicable for each HFPL ordered and is dependent on the specific service configuration requested.

- Loop Conditioning Charges

Assessed for CLEC requested conditioning of HFPL loops. Charges are assessed based on the type and amount of conditioning requested and the length of the facility being conditioned.

4.3 Service Coordination Fee

This fee applies to each bill, per central office, that is rendered. (T)

ULS Port Charges

All ULS line-side port nonrecurring and monthly rates are on a per port basis.

The DID Trunk Port nonrecurring charge and monthly rate apply on an individual channel basis.

The ISDN-Prime Port nonrecurring charge and monthly rate apply on a per ISDN-Prime port.

The Digital Trunking Trunk Port nonrecurring charge and monthly rate apply per 24 channel increment basis (DS1 level) not on an individual channel basis.

The ULS Trunk Port nonrecurring charge and monthly rate apply per a 24 channel increment basis (DS1 level) not on an individual channel basis.

The Conversion nonrecurring charge applies when changing from one type of line-port to another and is applied per change.

Centrex System Charges

System Features charge is a monthly recurring rate and is always applied when Centrex is provided and is per Centrex Common Block.

Common Block charge is a nonrecurring charge which is applied at the time of initial installation where it requires building a new Centrex Common Block.

System Feature Change and Rearrangement nonrecurring charge is applied per feature and per occasion to changes or rearranges to existing (installed) features currently assigned and working in the Centrex Common Block.

System Feature Activation nonrecurring charge is applied per system feature and per occasion to a system feature for the initial activation except if the system feature was installed during the initial Centrex installation, then this charge is not applicable.

Interoffice Transport Facility (cont'd)

Optional Features and Functions

The Optional Features and Functions rate category provides for optional features and functions which may be added to an Unbundled Interoffice Transport facility to improve its quality or utility to meet specific communications requirements. These are not necessarily identifiable with specific equipment, but rather represent the end result in terms of performance characteristics which may be obtained. These characteristics may be obtained by using various combinations of equipment. Although the equipment necessary to perform a specified function may be installed at various locations along the path of the service, it will be charged for as a single rate element.

Optional features that may be used with Unbundled Interoffice Transport are as follows:

- Clear Channel Capability

An arrangement which allows a carrier to transport 1.536 Mbps of information on a 1.544 Mbps line rate with no constraint on the quantity or sequence of one and zero bits.

Clear Channel Capability is provided for both unbundled point to point and channelized Ameritech DS1 service and is a required option for Ameritech DS1 service when Ameritech 64 Kbps channels are multiplexed onto the Ameritech DS1 Service.

E. PRICES (cont'd)

Types of Rates and Charges (cont'd)

• Nonrecurring Charges

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation of new elements and rearrangements of installed elements). The Nonrecurring charges that apply for installation of Unbundled Interoffice Transport are the Administrative Charge, the Design and Central Office Connection Charge, and the Carrier Connection Charge. These installation charges are in addition to other applicable charges, as set forth in Service Elements, following.

(C)
↓
(C)

An Administrative Charge applies any time a telecommunications carrier initiates an order. This charge applies once per telecommunications carrier order, regardless of the number of transmission facilities ordered. The applicable charges are set forth in Service Elements, following.

A Design and Central Office Connection Charge applies any time a telecommunications carrier initiated order requires engineering design and/or connection or changes at the Company central office. This charge applies once per Entrance Facility or Interoffice Transport Facility provided.

A Carrier Connection Charge applies once per Entrance Facility provided.

SECTION 12 - Unbundled Interoffice Transport

Cancels
Original Sheet No. 28

1. UNBUNDLED TRANSPORT (cont'd)

E. PRICES (cont'd)

Types of Rates and Charges (cont'd)

• Usage Rate

The usage rate is a recurring rate that applies per each minute-of-use or fraction thereof for calls transported over FCC-DST and is billed to the originating telecommunications carrier.

Rate Zones

(T)

Rate zones are applicable to DS1 (1.544 Mbps) and DS3 (44.736 Mbps) facilities. Each Company central office has been assigned to a rate zone as described in Section 7.7 of Tariff F.C.C. No. 2. Entrance Facility, Interoffice Mileage and Interoffice Mileage Termination rates are dependent upon the zone assignment of the central office. Interoffice mileage that is computed between central offices in different rate zones will be assessed the rates in the higher rate zone. Multiplexing rates will be determined by the location of the multiplexing arrangement.

(T)

(T)

Mileage Measurement

The mileage to be used to determine the Interoffice Mileage charges is calculated on the airline distance, using the V&H coordinates method. This method is set forth in the Exchange Carrier Association Tariff F.C.C. NO. 4 for Wire Center Information (V&H coordinates). To determine the amount to be billed, first compute the mileage using the V&H coordinates method. If the calculation results in a fraction of a mile, round up to the next whole mile.

Ordering Conditions

(N)

A telecommunications carrier may order any number of Unbundled Interoffice Transport network elements of the same type and between the same locations in a single order. All details concerning Unbundled Interoffice Transport network elements for a particular order must be identical. All network elements on an order must have the same carrier requested service date.

The telecommunications carrier shall provide all information necessary for the Company to provide and bill for the requested service.

1st Revised Sheet No. 1

1. PROVISION OF EXISTING COMBINATIONS OF NETWORK ELEMENTS

A. DESCRIPTION

General

Ameritech Illinois, hereinafter referred to as the "Company", provides to requesting telecommunications carriers combinations of network elements. Specifically, the Company provides currently combined Unbundled Local Loop and Unbundled Local Switching with Shared Transport (ULS-ST) as described below and as defined in Sections 2, 3 and 21 of this tariff respectively.

(C)

All terms, conditions, regulations and application of rates/charges contained in Sections 2, 3 and 21 of this Part, apply to this Section unless expressly provided to the contrary as specified below:

(T)

- Collocation, as defined in Part 23, Section 4 of this tariff, is not required for access to currently combined Unbundled Local Loops and Unbundled Local Switching with Shared Transport.
- The Unbundled Local Loop and ULS-ST Port nonrecurring, line/port connection charges are not applicable.

(D)

|

(D)

- Non-Telecommunications Services shall not be included with Provision of Existing Combinations of Network Elements. This includes, but is not limited to, voice mail, inside wire maintenance, customer premises equipment and calling card services.
- Telecommunications carriers that already have an interconnection agreement with the Company pursuant to Section 252 of the Telecommunications Act of 1996 shall be permitted to subscribe to Provision of Existing Combinations of Network Elements under this tariff.

Pursuant to SBC/Ameritech Merger Conditions in Ill. C.C. Docket No. 98-0555 dated September 23, 1999

E. RATE APPLICATION

Sub-Loop Rates and Charges are shown in F. Prices following. Rates are applied as follows:

Unbundled Sub-Loop Rates and Charges

Rates and charges for unbundled Sub-Loops are applied on an individual Sub-Loop basis.

Service Charges

Service Order Charges

Service Order Charge - nonrecurring charge which covers receiving, recording and processing information necessary to execute a telecommunications carrier's request. Unless otherwise specified, the appropriate Service Order Charge is applicable for a telecommunications carrier order for equipment or service and is in addition to any other nonrecurring charges which may be applicable for the equipment or service furnished.

(N)

Analog and 2-Wire Digital Sub-Loops

(N)

- Initial

(T)

The Initial Service Order Charge, as appropriate, applies when a telecommunications carrier initiates an order for an analog or 2-Wire Digital sub-loop. This charge applies per occasion per order per telecommunications carrier's end user location.

(T)

- Subsequent Charge

(N)

This charge is applicable when adding or changing service on an existing sub-loop service. This charge applies per occasion per order per telecommunications carrier's end user location.

- Record Work Only

(N)

This charge applies to a subsequent request that involves only record activity.

Digital Sub-Loops

- Administrative Charge - applies when a telecommunications carrier initiates an order for installation or for disconnection. This charge applies per carrier order regardless of the number of digital sub-loops on the order.
- Design and Central Office Connection Charge - applies when a telecommunications carrier's initiated order requires engineering design and/or installation or disconnection or change at the Company wire center. This charge applies per digital sub-loop on the order.
- Carrier Connection Charge - applies when a telecommunications carrier's initiated order requires installation or disconnection or change at the telecommunications carrier's end user location. This charge applies per digital sub-loop on the order.

E. RATE APPLICATIONS (cont'd)

ULS Port Rates Associated with ULS-ST

All ULS-ST line-side port nonrecurring and monthly rates are on a per port basis.

The DID Trunk Port nonrecurring charge and monthly rate apply on an individual channel basis. The per telephone number applies to each DID telephone number assigned to the DID Trunk Port's trunk group.

The ISDN Prime Port nonrecurring charge and monthly rate apply on a per-ISDN Prime port basis.

The Digital Trunking Trunk Port nonrecurring charge and monthly rate apply on a per-trunk port (DSL level) basis.

The Conversion nonrecurring charge applies when changing from one type of line-port to another (basic line port to ground start and vice versa) and is applied on a per-change basis.

Rates for these charges are shown in Part 19, Section 3 of this Tariff and in F. of this Section.

E. RATE APPLICATIONS (cont'd)

Centrex System Rates Associated with ULS-ST

System Features charge is a monthly recurring rate and is always applied when Centrex is provided and is per Centrex Common Block.

The Common Block Installation charge applies at time of Centrex installation and is per Centrex Common Block arrangement.

System Feature Change and Rearrangement nonrecurring charge is applied per feature and per occasion to changes or rearranges to existing (installed) features currently assigned and working in the Centrex Common Block.

System Feature Activation nonrecurring charge is applied per system feature and per occasion to a system feature for the initial activation except when the system feature is installed during the initial Centrex installation.

Rates for these charges are shown in Part 19, Section 3 of this Tariff and in F. of this Section.

(C)

Service Order Rate Associated with ULS-ST

Service Order Charge - nonrecurring charge which covers receiving, recording and processing information necessary to execute a telecommunications carrier's request. Unless otherwise specified, the appropriate Service Order Charge is applicable for a telecommunications carrier order for equipment or service and is in addition to any other nonrecurring charges which may be applicable for the equipment or service furnished.

For the purpose of the application of Service Order Charges, ULS-ST ports with line-side attributes are grouped, based upon the feature complexity level of the port type, into two categories: Basic and Complex. The Basic type of ports include: Basic Port, Ground Start Line Port, Basic Centrex Line Port and DID Port. The Complex type of ports include: ISDN Direct Port, ISDN Prime Port, Digital Trunking Trunk Port, Centrex ISDN Port, Centrex EKL Port and Centrex Attendant Port.

Installation Request Charges

The appropriate Basic Port or Complex Port or ULS-ST Trunk Port nonrecurring charge applies each time a telecommunications carrier initiates an order for ULS ports. All ULS-ST ports on the order must be of the same port type, served out of the same central office and have the same carrier requested due date. One installation charge applies per order.

Subsequent, per occasion, nonrecurring charge is applicable when adding or changing service on an existing ULS-ST port or feature.

Record Order, per occasion, nonrecurring charge is applicable for telecommunications carrier initiated requests for changes and/or additions to records only.

Conversion Order, per occasion, nonrecurring charge is applicable when changing from basic line port to ground start port or vice-versa.

Rates for these charges are shown in F. of this Section.

(C)

Ameritech Cross-Connection Service Rate Associated with ULS-ST

Ameritech Cross-Connection Service rates, as described in Part 23, Section 4, are applicable when ULS-ST ports are provisioned to be cross-connected to transmission equipment provided by the telecommunications carrier or a third party and are applied per applicable port cross-connected based on the type of interface (2-wire or 4-wire, etc.).

Rates for this service are shown in Part 23, Section 4 of this Tariff.

SECTION 22 Interim Provision of New UNE-P,
EEL, and Reconfiguration of Special
Access Arrangements to UNE
Combinations

1st Revised Sheet No. 1
Cancels
Original Sheet No. 1

**1. INTERIM PROVISION OF NEW UNE-P, EEL, AND RECONFIGURATION OF SPECIAL
ACCESS ARRANGEMENTS TO UNE COMBINATIONS**

General

Ameritech Illinois, hereinafter referred to as the "Company", offers to combine on the behalf of telecommunications carriers certain New combinations of Unbundled Local Loop and Unbundled Local Switching with Shared Transport, as described in Sections 2, 3 and 21 of this Part. This offering is referred to as the New Unbundled Network Elements Platform (New UNE-P).

(T)

In addition, upon request, the Company will combine certain combinations of Unbundled Local Loop and Unbundled Dedicated Transport, as described in Sections 2 and 12 of this Part, respectively. This offering is referred to as Enhanced Extended Loop (EEL). The Company also provides to requesting telecommunications carriers the reconfiguration of qualifying special access arrangements to unbundled network element (UNE) combinations as described below.

Telecommunications carriers that have an effective interconnection agreement with the Company pursuant to Section 252 of the Telecommunications Act of 1996 shall be permitted to subscribe to the provisions under this tariff.

This Part 19, Section 22, Interim Provision of New UNE-P, EEL, and Reconfiguration of Special Access Arrangements to UNE Combinations, will automatically expire and the offerings made hereunder shall no longer be available on and after the earlier of (i) March 31, 2002, or (ii) the effective date of the tariff amendments filed under Advice No. 7509 to comply with Section 13-801 of the Illinois Public Utilities Act or such revised tariff amendments as may be filed to comply with Section 13-801 under a successor Advice Letter(s).

The Company has filed this Part 19, Section 22, with the exception of Special Access to UNE Conversions, under compulsion of the Illinois Public Utilities Act, including as amended by Illinois Public Law 92-0222, and specifically reserves any and all rights and remedies it may have relating to possible challenges to Illinois Public Law 92-0222 and this tariff under state and federal law, including federal preemption law.

EEL, and Reconfiguration of Special
Access Arrangements to UNE
Combinations

1st Revised Sheet No. 2

Cancels

Original Sheet No. 2

**1. INTERIM PROVISION OF NEW UNE-P, EEL, AND RECONFIGURATION OF SPECIAL
ACCESS ARRANGEMENTS TO UNE COMBINATIONS (cont'd)**

General (cont'd)

The General Regulations, found in Part 2 of this Tariff and Section 1 of this Part, apply to this Part unless otherwise specified in this Part. As applicable in the context of this Section, the term "customer", which appears in Part 2, General Regulations, shall be deemed to mean "telecommunications carrier" as used in this Section.

New UNE-P

The telecommunications carrier may request the Company to perform the work to combine the unbundled network elements specified below so that the telecommunications carrier can obtain the following types of New UNE-P combinations:

- 2-Wire Basic Analog Loop with Basic Line Port
- 2-Wire 160kbps (ISDN-BRI) Digital Loop with ISDN Direct Line Port
- 4-Wire Digital (DS1 Loop) with Digital Trunk Port

(T)

All terms, conditions, regulations and application of rates/charges contained in Sections 2, 3 and 21 of this Part, apply to this Section.

(C)

Non-Telecommunications Services shall not be included with Provision of New UNE-P. This includes, but is not limited to, voice mail, inside wire maintenance, customer premises equipment and calling card services.

ULS-ST with IntraLATA Toll Capability

Upon request, the Company will include with the Unbundled Local Switching with Shared Transport (ULS-ST) offering, as described in Part 19, Section 21 of this Tariff, a capability for the transmission of intraLATA toll calls originating from the purchasing carrier's retail end-user customers who are being provided local exchange service using ULS-ST. This intraLATA toll capability is only available when the carrier purchasing ULS-ST is also the pre-subscribed intraLATA toll carrier for the retail end-user customer being served by the ULS-ST. The capability will be provided from the Company's originating end-office where the ULS is being provided for such end-user customer.

PART 19 - Unbundled Network Elements and Number
Portability

SECTION 22 Interim Provision of New UNE-P,
EEL, and Reconfiguration of Special
Access Arrangements to UNE
Combinations

1st Revised Sheet No. 4
Cancels
Original Sheet No. 4

**1. INTERIM PROVISION OF NEW UNE-P, EEL, AND RECONFIGURATION OF SPECIAL
ACCESS ARRANGEMENTS TO UNE COMBINATIONS (cont'd)**

Enhanced Extended Loop (EEL) (cont'd)

- 2-Wire Analog Loop to DS1 or DS3 Dedicated Transport facilities
- 4-Wire Analog Loop to DS1 or DS3 Dedicated Transport facilities
- 2-Wire Digital Loop to DS1 or DS3 Dedicated Transport facilities
- 4-Wire Digital Loop(DS1 Loop) to DS1 or DS3 Dedicated Transport facilities

(T)

All terms, conditions, regulations and application of rates/changes
contained in Sections 2 and 12 of this Part, apply to this Section.

(C)

The Company will cross-connect Unbundled 2 or 4-wire Analog or 2-wire Digital loops to Unbundled DS1 or DS3 Dedicated Transport facilities for the telecommunications carrier's provision of circuit switched or packet switched telephone exchange service to the telecommunications carrier's own end user customers. The Company will also cross-connect Unbundled 4-wire Digital loops (DS1 loops) to Unbundled DS1 or DS3 Dedicated Transport facilities for the telecommunications carrier's provision of circuit switched telephone exchange service to telecommunications carrier's own end user customers. The Unbundled Dedicated Transport facility will extend from telecommunications carrier's customer's Company serving wire center to the telecommunications carrier's collocation cage in a different Company central office in the same LATA. Telecommunications carriers must order the Unbundled Dedicated Transport facility, with any necessary multiplexing, from the telecommunications carrier's collocation cage to the wire center serving the telecommunications carrier's end user customer. The telecommunications carrier will order each loop as needed and provide the Company with the Channel Facility Assignment (CFA) to the Unbundled Dedicated Transport.

In addition, the unbundled network elements that comprise the EEL in this Part 19, Section 22 shall only be provided to the telecommunications carrier to the extent the EEL is used to provide a significant amount of local exchange service to a particular end user customer. This limitation is the same as the requirements set forth in the FCC's Supplemental Order Clarification in FCC CC Docket No. 96-98, FCC 00-183 (released June 2, 2000).

SECTION 22 Interim Provision of New UNE-P,
EEL, and Reconfiguration of Special
Access Arrangements to UNE
Combinations

1st Revised Sheet No. 5

Cancels

Original Sheet No. 5

**1. INTERIM PROVISION OF NEW UNE-P, EEL, AND RECONFIGURATION OF SPECIAL
ACCESS ARRANGEMENTS TO UNE COMBINATIONS (cont'd)**

Enhanced Extended Loop (EEL) (cont'd)

The telecommunications carrier's use of the EEL and its provision of telecommunications services is as specified, and subject to, the Telecommunications Act of 1996 ("the Act"), the rules, regulations, and orders of the FCC and the Commission, and any other applicable law.

Reconfiguration of Special Access Arrangements to UNE Combinations

Telecommunications carriers may request a reconfiguration of a special access arrangement to the Unbundled Network Element (UNE) Loop and Dedicated Transport combination when it can be certified that the telecommunications carrier uses that special access arrangement to provide a significant amount of local exchange service to its end-user customer pursuant to the criteria set forth by the Federal Communications Commission (FCC) in CC Docket No. 96-98, Supplemental Order Clarification, FCC 00-183, released June 2, 2000 or based on subsequent criteria as defined by the FCC in subsequent Orders released by the FCC that clarify or modify such criteria.

(T)

The Company will accept requests to reconfigure existing special access service arrangements to combinations of UNEs pursuant to the Ordering requirements posted on the Company's website at: <https://clec.sbc.com>.

For the reconfiguration of qualifying special access arrangements to combined UNEs, the Company will apply the recurring charges applicable to each UNE requested as contained in Sections 2 and 12 of this Part along with the appropriate non-recurring charges as shown in *RATE APPLICATION* and *PRICES* below.

(T)

(T)

All terms, conditions, regulations and application of rates/charges contained in Sections 2 and 12 of this Part, apply to the existing combination resulting from the reconfiguration of the special access circuit based on the type of Unbundled Loop and type of Unbundled Interoffice Transport that comprise the combination.

RATE APPLICATION AND PRICES

New UNE-P

All recurring charges applicable to each UNE comprising the combination as defined in Part 19, Section 2, Unbundled Loops and HFPL, Section 3, Unbundled Local Switching, and Section 21, Unbundled Local Switching with Shared Transport apply to New UNE-P with the following clarification:

- One (1) Cross-Connect service charge shall apply to each New UNE-P
- One (1) Service Coordination Fee shall apply to New UNE-P per carrier bill, per switch.

Non-Recurring Charges

The non-recurring charges applicable to New UNE-P are listed as follows. The rate application descriptions, with the exception of UNE-P Record Work Only Charge, are set forth in Part 19, Section 2, Unbundled Loops and HFPL and Section 21, Unbundled Local Switching with Shared Transport. The UNE-P Record Work Only Charge rate application description is as follows:

- The non-recurring UNE-P Record Work Only Charge applies per UNE-P order and for additions and/or changes to records only.

2-Wire Basic Analog Loop with Basic Line Port

-	UNE-P Record Work Only Charge, per order	\$1.02
-	Line Connection Charge - Loop	\$20.21
-	Basic Line Port Charge	\$53.01
-	ULS Billing Establishment Charge, if applicable	
-	per carrier, per switch	\$138.12
-	Custom Routing, via Line Class Code	
-	New LCC, per LCC, per switch	\$232.00
-	New Network Routing, per route, per switch	
	TBD ^{/1/}	

/1/ Pursuant to the order in Ill. C.C. Docket No. 98-0396, further action by the Commission is necessary to complete rates noted above as to be determined ("TBD").

PART 23 - Interconnection Service for Local
Exchange Telecommunications Carriers
SECTION 2 - Ameritech End Office Integration
Service

3rd Revised Sheet No. 3
Cancels
2nd Revised Sheet No. 3

3. COMPENSATION

3.1 Reciprocal Compensation

Each party agrees to compensate the other for terminated local service area calls^{/1/} originated on its network. The following rates apply for local service area calls and intraMSA calls originated on a carrier's network and terminated on the Company's network.^{/2/}

End Office Local Termination	\$0.003746 per MOU
Tandem Switching	0.001072 per MOU
Tandem Transport Termination	0.000201 per MOU
Tandem Transport Facility Mileage	0.000013 per MOU per Mile

3.2 Transiting

The telecommunication carrier agrees to compensate Ameritech for transit calls at the following rates.

- Transiting (Local and IntraLATA Toll):

Tandem Switching	.004836 per MOU
Tandem Transport	.000189 per MOU
Tandem Transport Facility	.000009 per MOU (R)/3/

/1/ Local service area calls are calls within Usage Bands A and B originating and terminating exchange combinations or Flat Rate Local Calling Areas as specified in Part 4, Section 2 of this tariff.

/2/ Non-local service area calls terminating on the Company's network are subject to Switched Access Service charges as found in Ameritech companies' Tariff F.C.C. No. 2, Section 6.

/3/ Interim rate pursuant to the Order in Ill. C.C. Docket No. 98-0396.
